40 % less wear!

Perfect spreading pattern with Strautmann ORIGINAL PARTS!

We tested:

- Replica throwshovels compared to Strautmann ORIGINAL throwshovels in Hardox quality
- Test setup: In a VS 2005, 4 throwshovels were replaced by replica parts. After 260 transported loads with a total of 2700t we evaluated the result:

Replica

Throwshovels strongly bent

Damage

Intensive wear

- Frequent change of throwshovels
- Inadequate lateral distribution
- Worse nutrient supply of soil

strautmann ORIGINAL PARTS

All throwshovels undamaged!

Hardly any traces of abrasion

40% less wear

- ✓ Cost-effective
- ✓ Consistent spreading quality
- ✓ Optimum nutrient supply of soil
