

Twice the service life with 50 % less wear!

We tested: Replica spreading tines compared to Strautmann ORIGINAL spreading tines in Hardox quality
Test setup: In a VS 2005, 10 spreading tines were replaced by replica parts.
 After 260 transported loads with a total of 2700t we evaluated the result:

REPLICA

4 tines bent due to foreign objects!

Damage

Considerable abrasion

Intensive wear

- Frequent change of tines
- Less throughput and chopping
- Worse nutrient supply of soil

STRAUTMANN GENUINE PARTS

All tines undamaged!

Hardly any traces of abrasion

50% less wear

- Cost-effective
- Consistent spreading quality
- Optimum nutrient supply of soil
