

Perfect spreading pattern with 40 % less wear!

**We tested:** Replica throwshovels compared to Strautmann ORIGINAL throwshovels in Hardox quality  
**Test setup:** In a VS 2005, 4 throwshovels were replaced by replica parts.  
 After 260 transported loads with a total of 2700t we evaluated the result:

## REPLICA

Throwshovels strongly bent!

Damage

Intensive wear

- Frequent change of throwshovels
- Inadequate lateral distribution
- Worse nutrient supply of soil

## STRAUTMANN GENUINE PARTS

All throwshovels undamaged!

Hardly any traces of abrasion

40% less wear

- Cost-effective
- Consistent spreading quality
- Optimum nutrient supply of soil
